About the Institution

Government College of Engineering, Srirangam (GCES) is a premier government engineering institution committed to excellence in technical education, innovation and research.

The college provides a supportive learning environment with modern infrastructure, experienced faculty and industry-oriented training. It focuses on developing skilled, responsible and employable engineering professionals.

GCES is approved by AICTE and affiliated with Anna University.

About the Department of CSE

The Department of Computer Science and Engineering is committed to excellence in computing education, innovation and research. It equips students with strong technical expertise, problem-solving abilities and industry-ready skills through practical learning and emerging technologies.

About the Institution

"Empowering students into skilled, ethical engineers and critical thinkers ready to serve industry and the nation.

— Dr.K.Manonmani, M.E.,Ph.D.,
— Principal

Preparing students for excellence in research, placements, and the IT industry with strong technical and moral values."

— Dr. L. Rasikannan, M.E., Ph.D.
— Associate Professor & HOD

6 + Programmes

80 + Faculty

1,500 + Students

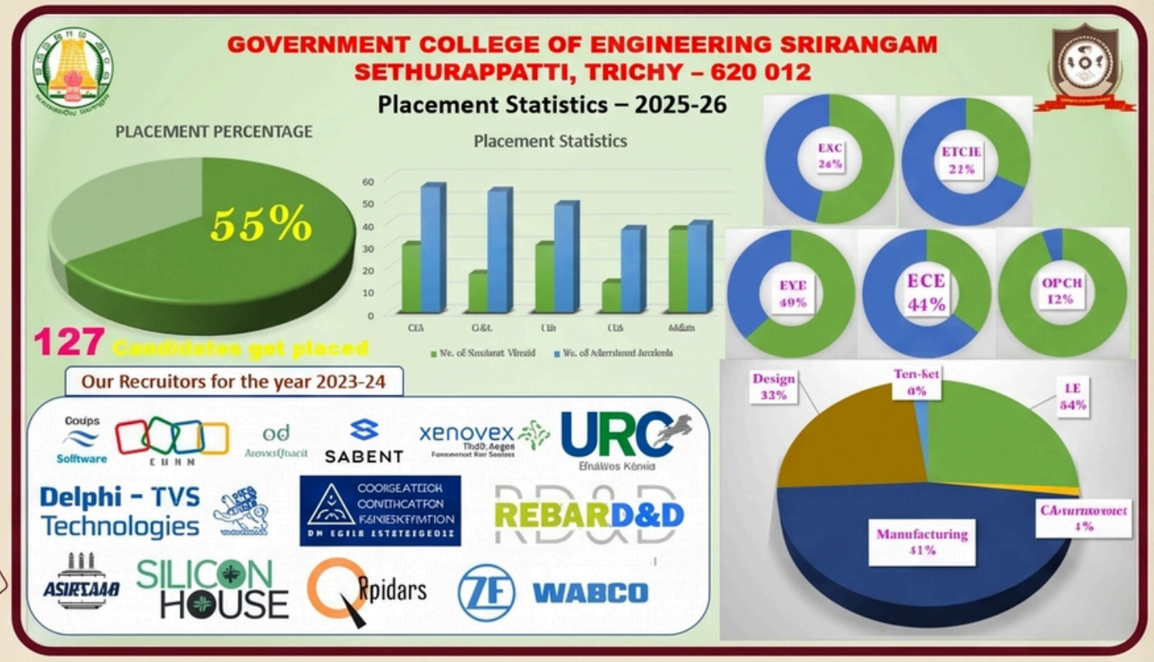
Campus Invitation: GCE-Srirangam invites industry partners to recruit from a proven pool of talent known for academic excellence, research, and technical capability.

Industry Readiness: Students undergo continuous industry-aligned development, including hands-on in-plant training with reputed organizations.

Global Alumni Impact: Graduates hold prestigious roles across leading domestic and international enterprises.

Placement Snapshot



Our department prioritizes career development and industry readiness, equipping students with core technical and professional skills to secure opportunities across key sectors like IT, manufacturing, infrastructure, and design with leading organizations.

55% Placement Rate | 127 Candidates Placed

Why Recruit From Our CSE Department

"Admitted through rigorous merit and forged through deep technical mastery, our students transform sharp intellectual talent into impactful industry solutions."

We develop agile problem solvers proficient in core computer science, software engineering, and modern tech stacks. Through rigorous academic training, practical project experience, and hands-on coding culture, our graduates are built to hit the ground running and deliver immediate value in fast-evolving tech environments.

Recent Achievements

- Generative AI (GenAI) Skillset Workshop conducted in association with GUVI–HCL for department students
- First Prize – Cipher Lab AI National-Level Hackathon, secured by CSE students
- Overall Champions at InfoQuest National Level Symposium, Government College of Technology, Coimbatore – Two Consecutive Years
- Our students have successfully designed, developed, and deployed innovative applications—including the Hostel App. BloodLine, Mess Reduction App, and No Due App—to streamline and enhance campus operations.

Wall of Fame

Our Student Innovations

GCES Blood Line

GCES BloodLine connects campus blood donors and recipients for quick emergency support and faster coordination.

Hostel App

A student-developed hostel app simplifying mess attendance, food reviews, and hostel communication on one platform.

No Due

No Due Clearance Portal digitizes and streamlines student clearance with online requests, real-time tracking, approvals, and reports.

Mess Reduction

Hostel Mess Reduction System digitizes mess reduction requests with streamlined approvals, tracking, notifications, and report management.

Partner With Us

- We invite organisations to partner with our Training & Placement Cell to connect with talented, skilled, and industry-ready students. We provide a strong platform for campus recruitment, internships, pre-placement talks, technical assessments, and interview drives tailored to your hiring requirements.

- We also welcome collaborations through industry projects, skill-development programmes, expert sessions, and academic–industry partnerships. Together, we aim to create valuable career opportunities for students while supporting organisations in building a strong and future-ready talent pool.
